I Core Modules

Finance & Accounting

Behavioral Finance

B

International Economics and Politics

Globalization and Regional Economic Institutions

A

Investment & Industrial Analysis

First, we will discuss how economic variables affect financial markets and, in particular, stock prices and interest rates. We will examine and interpret information from the Financial Times, seeing in practice what the most important economic indicators are.

Secondly, the ultimate goal of corporations is to take on the best possible projects (e.g., a plant expansion) and finance them the best way possible (e.g., issuing debt or equity). The time and uncertainty of investment payoffs make these problems nontrivial and essential for long-term success. One of the main questions of Corporate Finance is to answer how to value and choose projects and to value of a company?

The aim of our sessions is to give you a framework to understand and answer these issues in theory and practice. We will apply basic concepts to talk about techniques that are the main workhorses of valuation: Multiples and Discounted Cash Flows (DCF) valuation.
